**13.** Your Next Step: The AI Audit

# Why Automation?

Most business owners are trapped in the "**Manual Loop**." They spend 60% of their time on repetitive tasks: answering calls, sending review requests manually, and following up with leads who ghost them. This is expensive, slow, and prone to human error.

**78%**

of customers choose the  
business that responds first

**95%**

SMS open rate vs 20%  
for email marketing

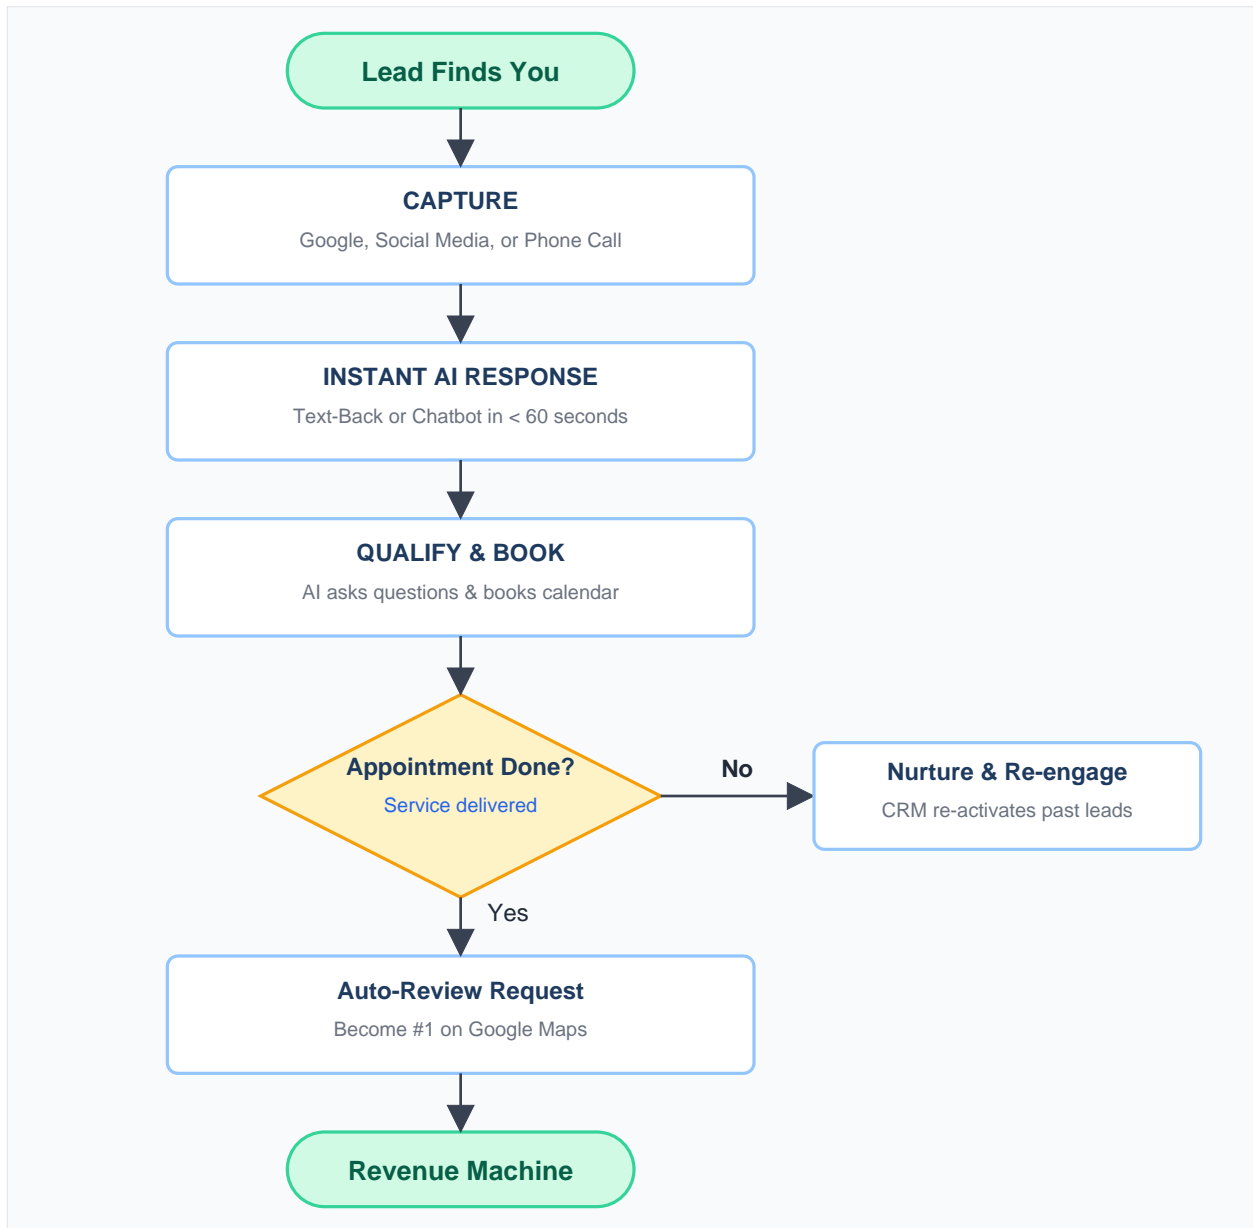

**\$1,800**

lost monthly from just  
3 missed calls per week

We specialize in installing "**Invisible Staff Members**" (**AI Systems**) that work 24/7 without taking a lunch break. Below are the 10 high-impact systems we deploy, each with a detailed flowchart showing exactly how it works inside your business.

# ■ The Master AI Workflow

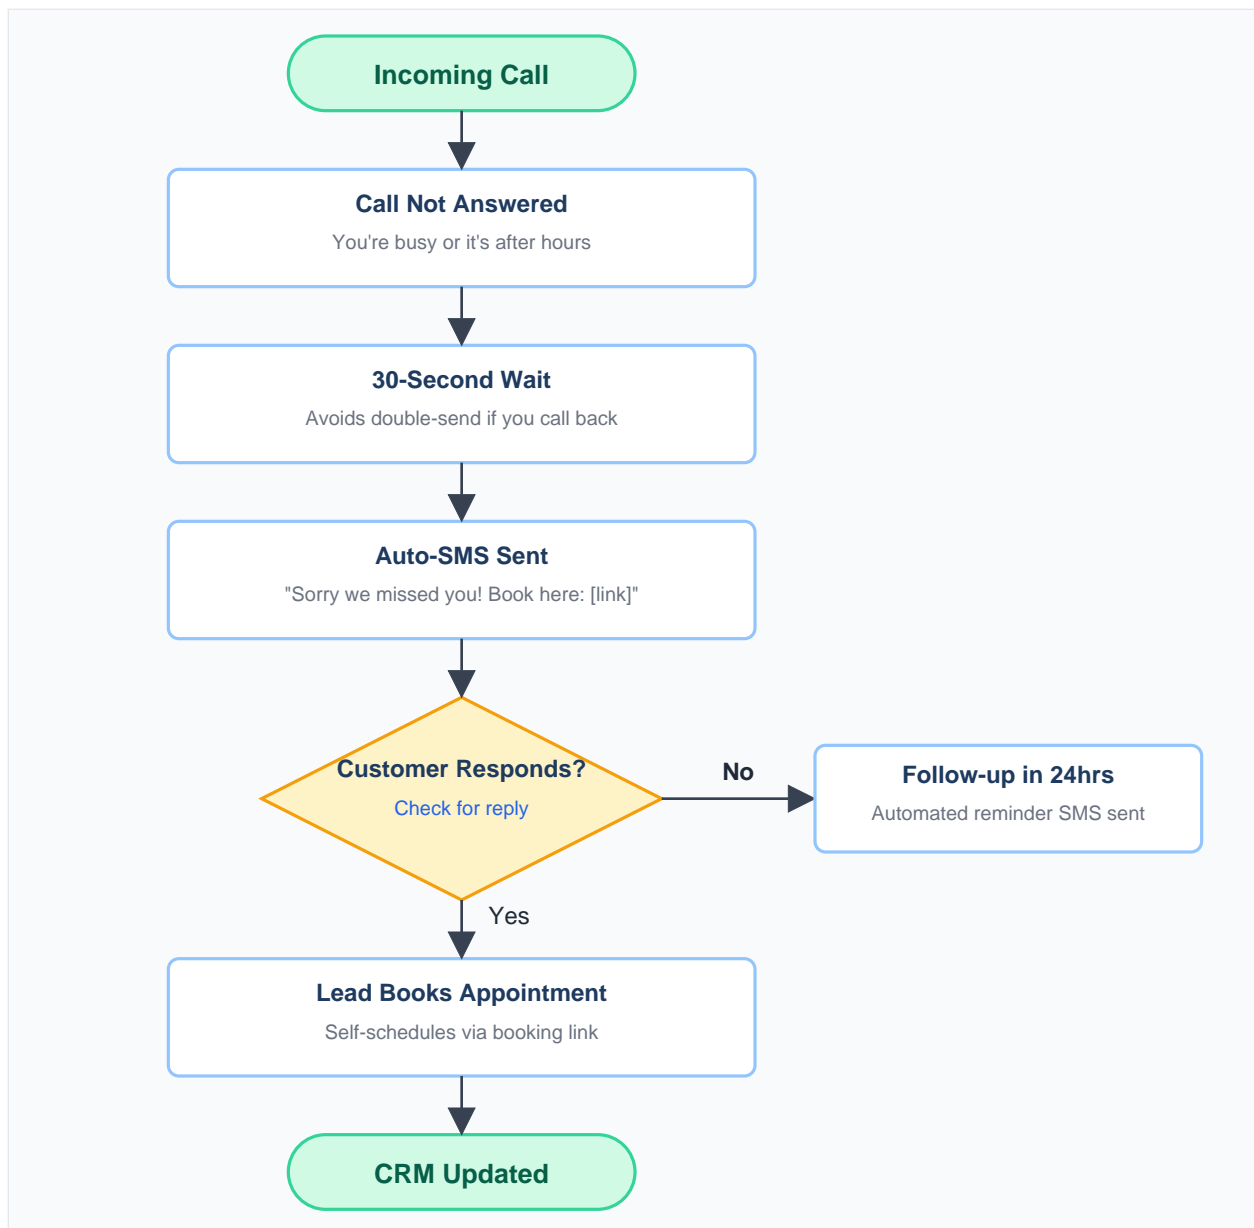

How all 10 systems work together to create a self-running revenue machine.

## ■ Missed-Call Text-Back System

Phone calls are your #1 lead source. But when you're on a job site, with a patient, or cutting hair — you miss calls. Each missed call is a customer who calls your competitor instead. Our system automatically texts anyone whose call goes unanswered with a personalized message and a booking link.

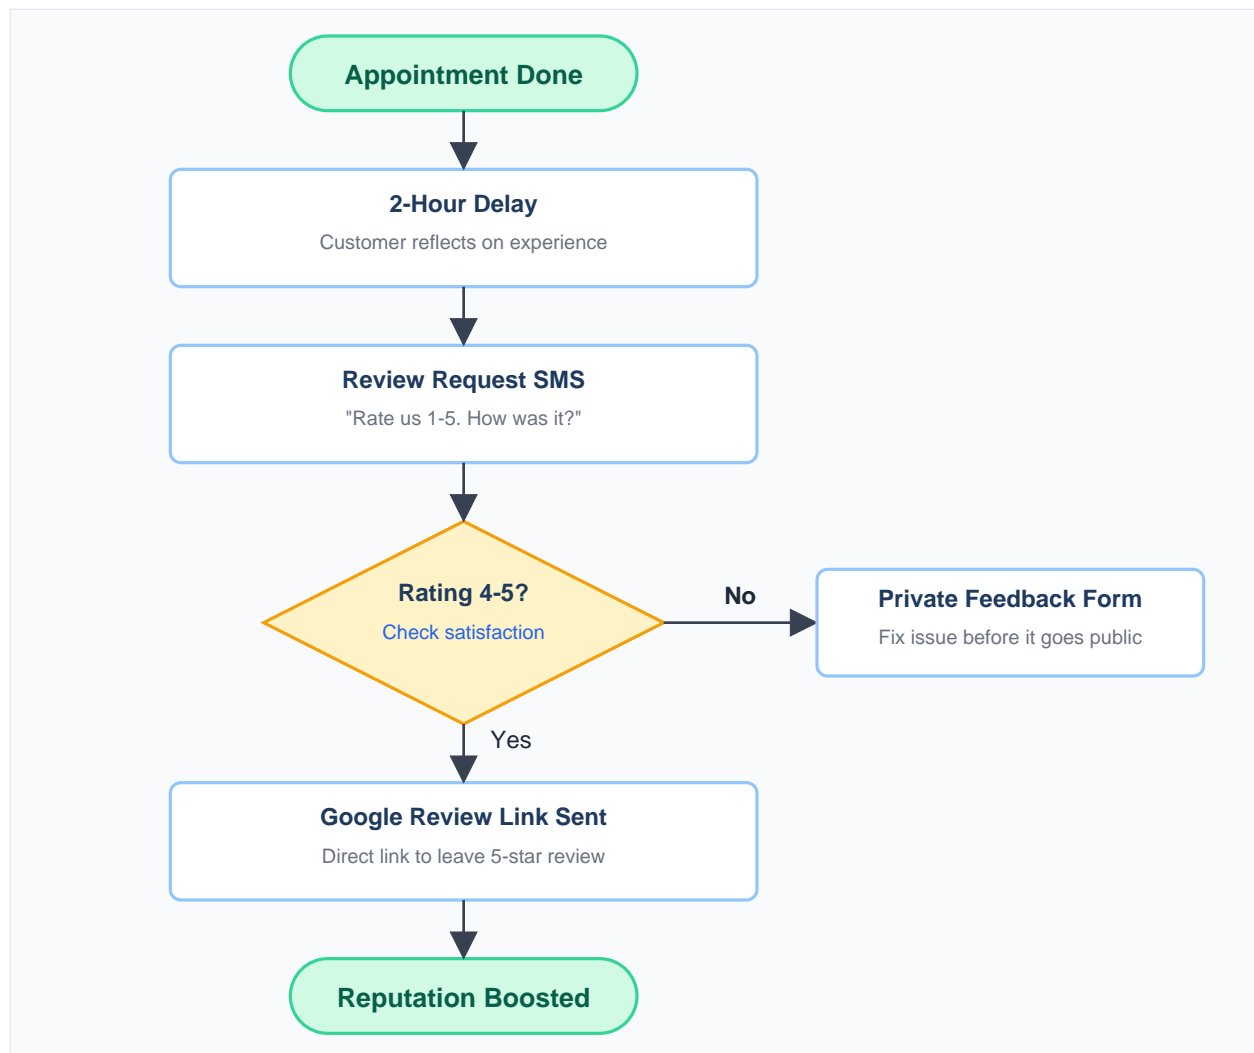

■ *Instantly recapture leads while you are busy. Turns missed calls into booked appointments.*

## ■ Automated 5-Star Review Generation

88% of consumers trust online reviews as much as personal recommendations. We set up an automated system that requests a Google review via SMS immediately after every appointment. A feedback funnel filters happy customers to Google and routes unhappy ones to private feedback.

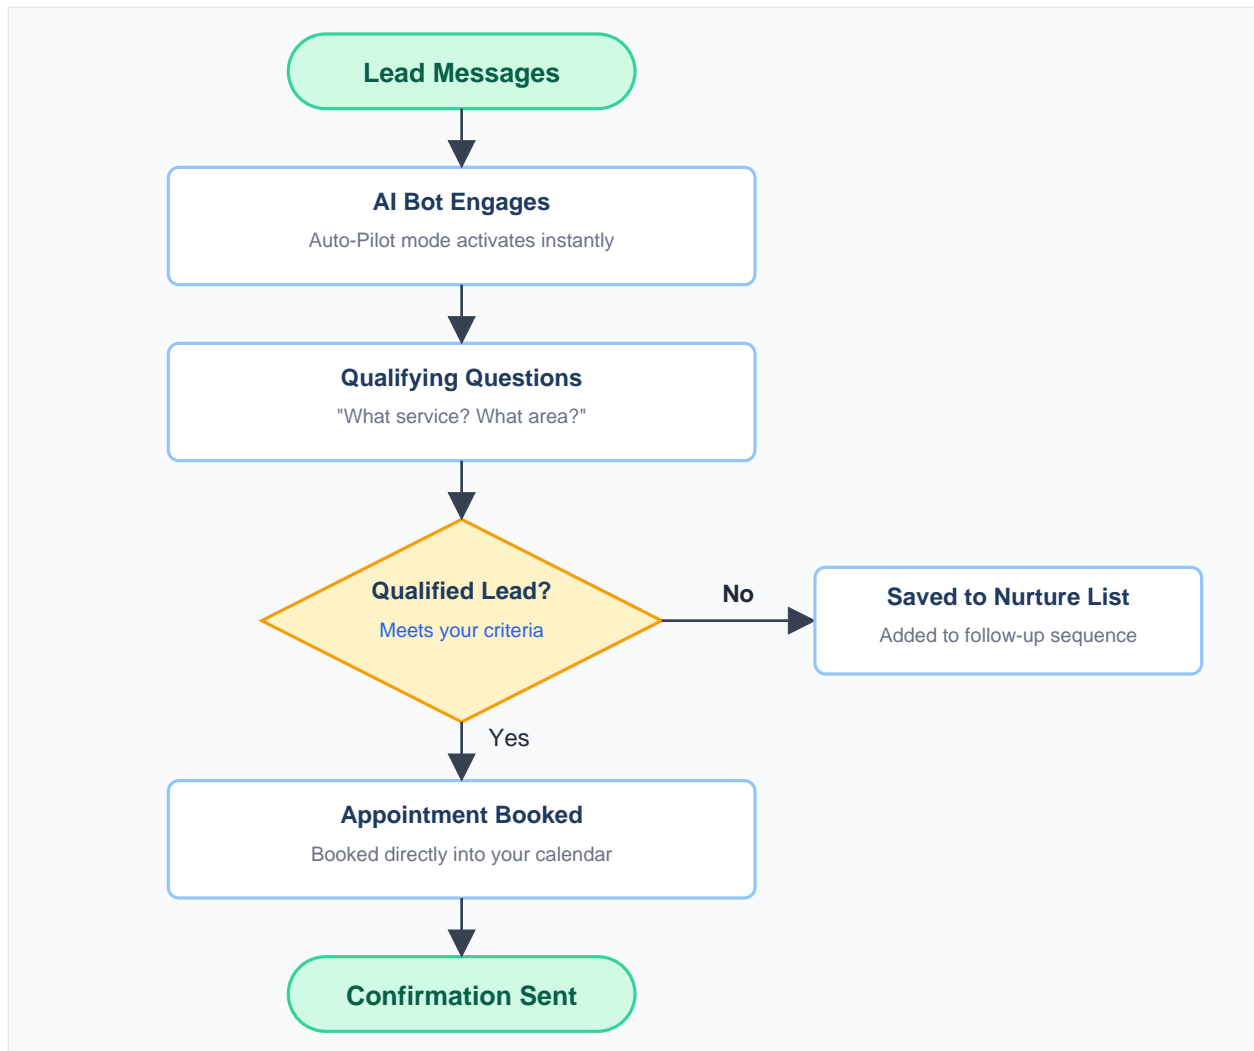

■ *Become the #1 most-reviewed business in your area. Dominate Google Maps rankings.*

## ■ 24/7 AI Booking Bot (Chatbot)

An intelligent conversational AI on your website, Facebook, and SMS. It answers questions, qualifies leads, and schedules appointments directly into your calendar — even at 2 AM. Powered by GoHighLevel Conversation AI.

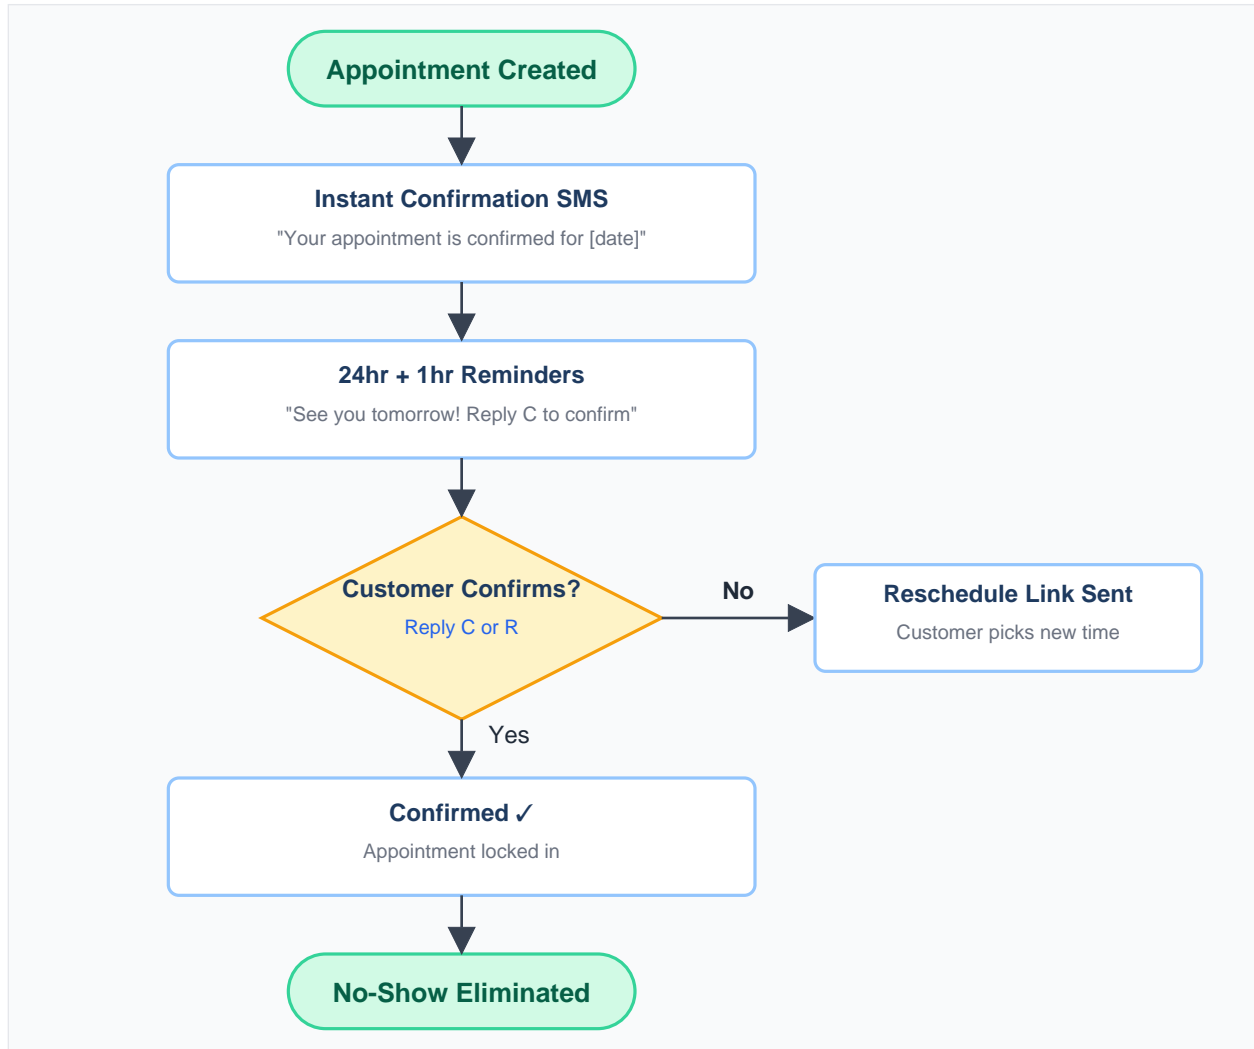

■ *Never miss a booking. AI handles lead qualification and scheduling 24/7.*

## ■ ■ SMS Appointment Reminders

No-shows cost service businesses thousands per year. We automate confirmations and reminders (24hrs and 1hr before) and allow customers to confirm or reschedule via a simple text reply.

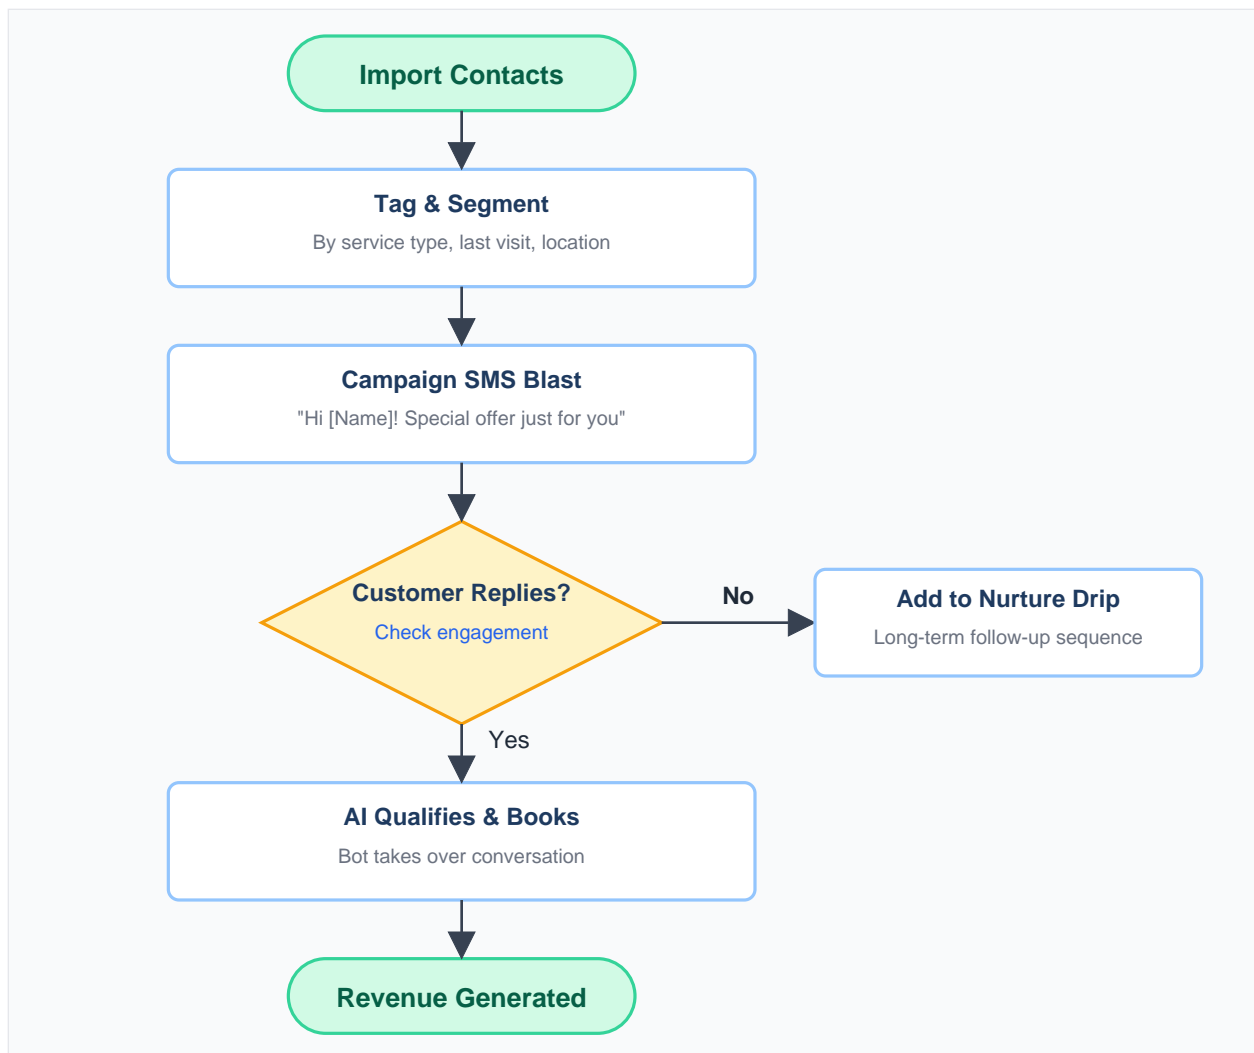

■ *Drastically reduce no-shows and eliminate endless scheduling phone calls.*

## ■ Database Reactivation

You already have hundreds of past customers in old spreadsheets. These people already trust you. We run automated "We Miss You" SMS campaigns with a compelling offer, generating instant revenue with zero ad spend.

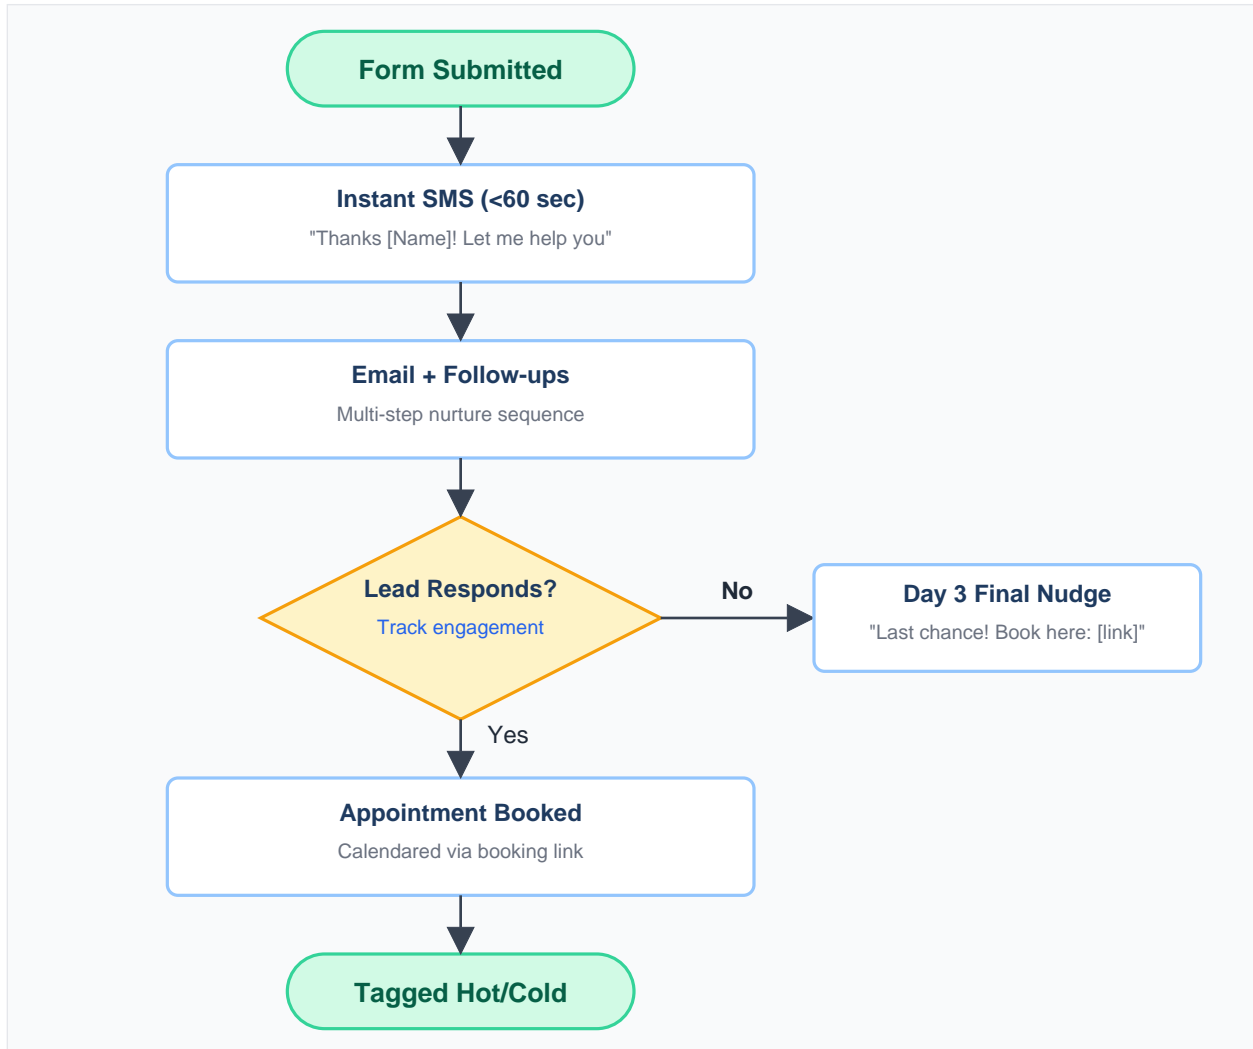

■ *Generate instant, zero-ad-spend revenue from people who already trust you.*

## ■ Automated Lead Follow-ups

78% of customers buy from the business that responds first. Our AI instantly follows up via SMS and email, nurturing the lead through a multi-step sequence until they book an appointment.

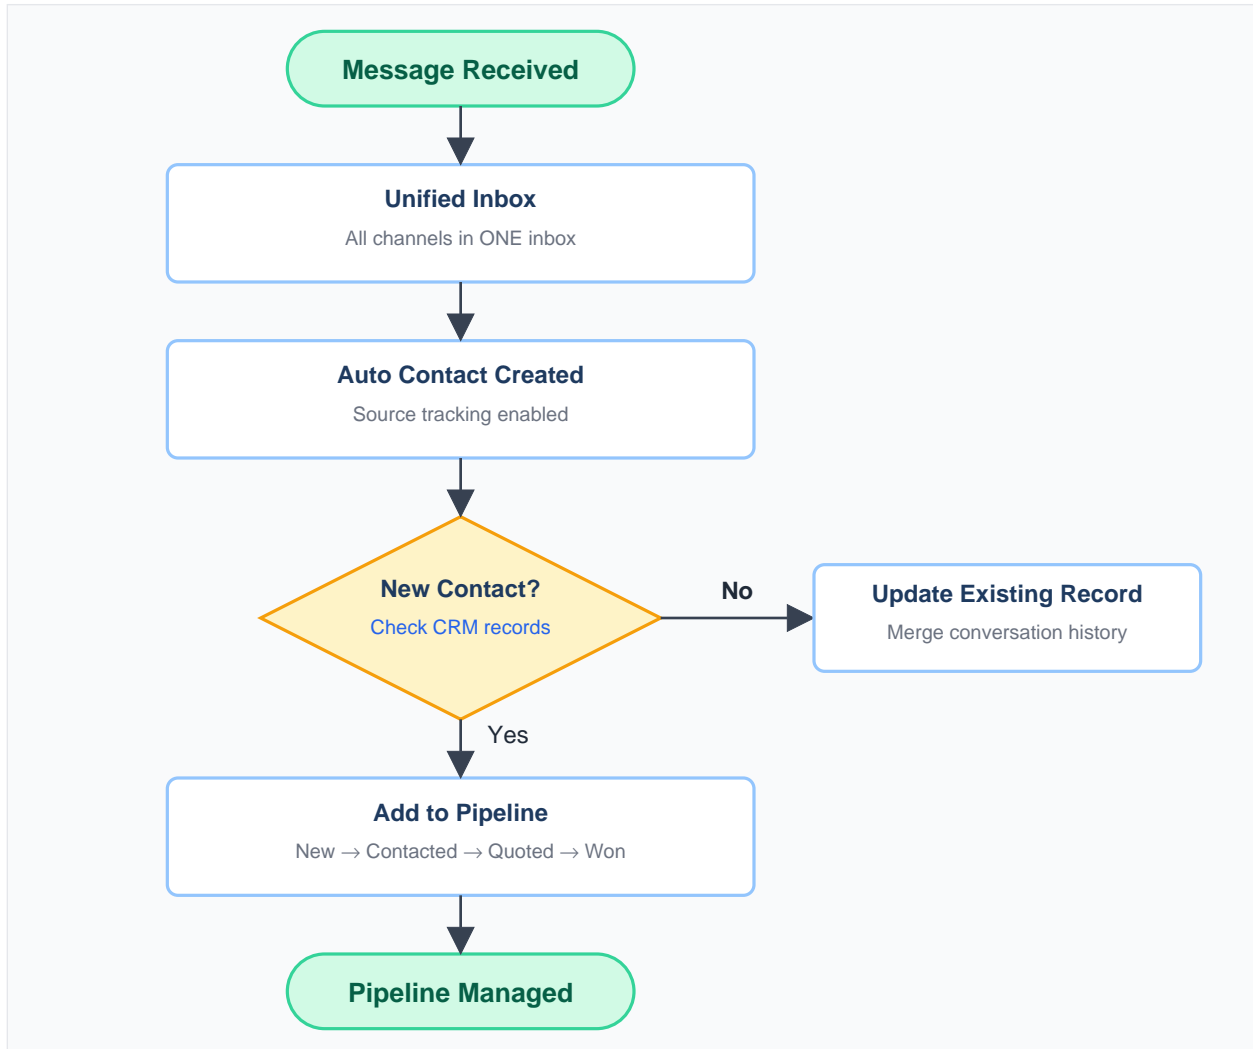

■ *Stop leads from going cold. Beat competitors by responding first, every time.*

## ■ Built-in CRM & Unified Inbox

No more pen-and-paper. One powerful dashboard to track every lead, manage every conversation (SMS, Facebook, Instagram, Email, Google Chat) in a single Unified Inbox.

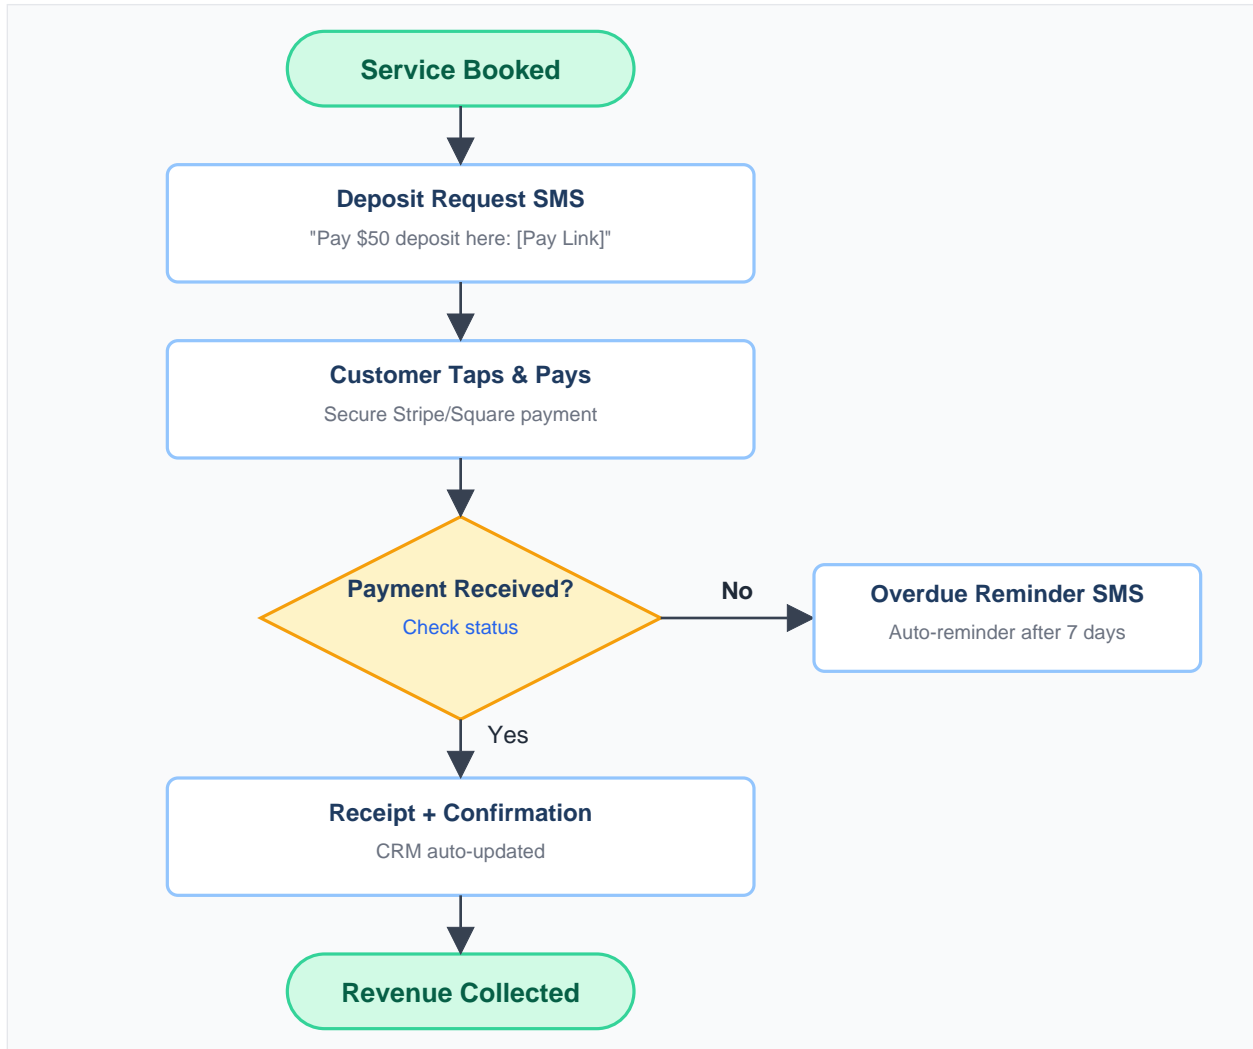

■ *Complete visibility over your pipeline. One place for everything.*

## ■ Frictionless Payment & Invoicing

Text-to-Pay and automated invoicing integrated into your workflow. Clients pay deposits via a simple text link. No more awkward collections calls. Payments tracked in CRM.

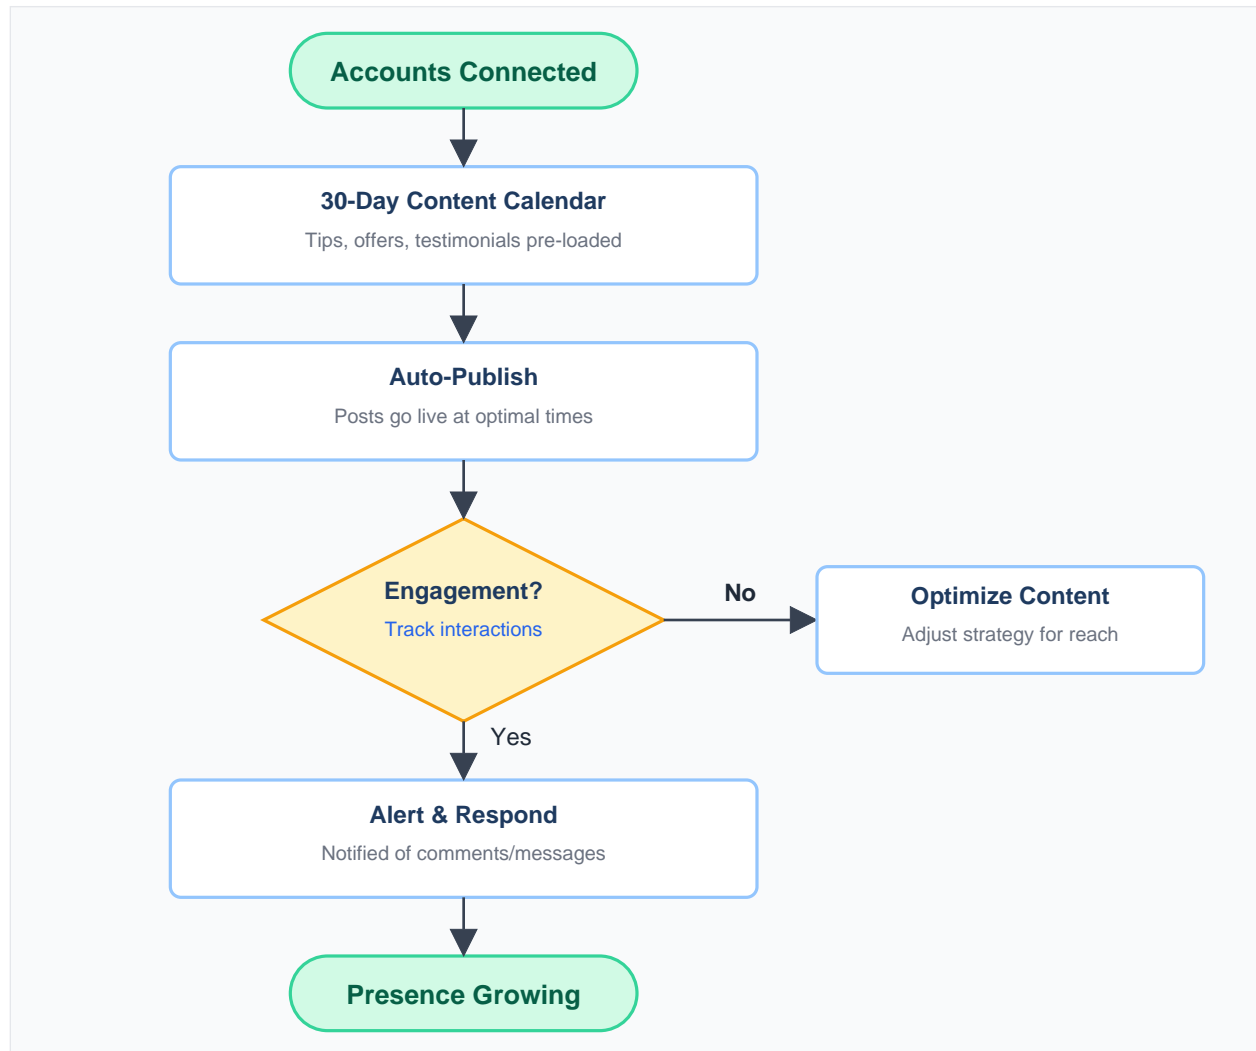

■ *Get paid faster with zero awkward collections calls.*

## ■ Social Media & GBP Automation

Automated content calendar that posts across Facebook, Instagram, and Google Business Profile simultaneously. Your brand stays visible and active without lifting a finger.

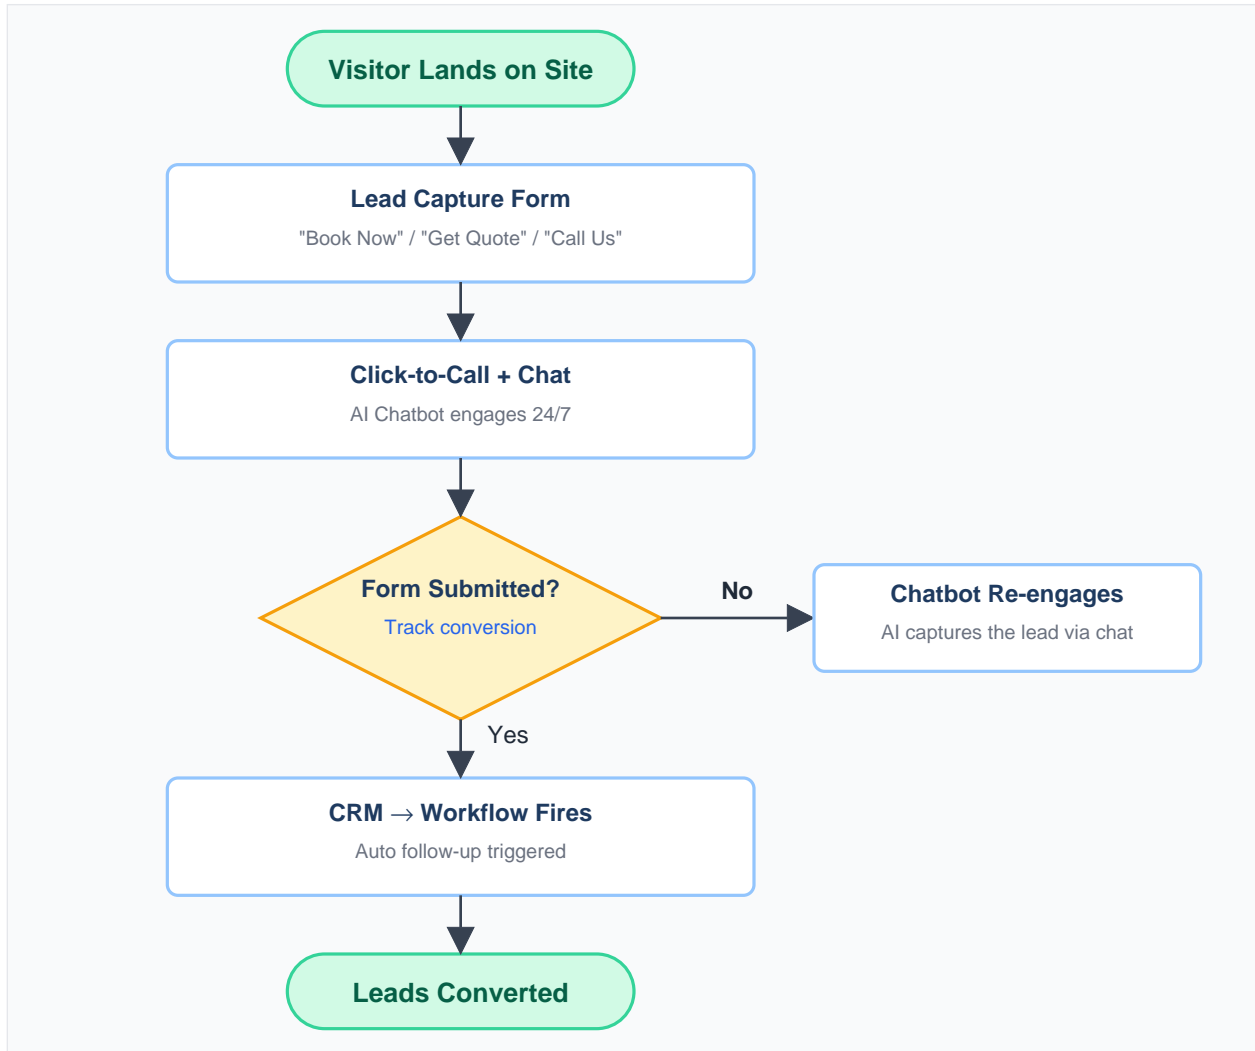

■ *Maintain a professional online presence while saving 5+ hours per week.*

## ■ High-Converting Local Websites

Lightning-fast, mobile-optimized landing pages designed to capture contact info and convert local traffic into booked appointments. Built inside GoHighLevel with forms, click-to-call, and live chat.

■ *Turn website clicks into actual appointments and phone calls.*

## ■ The ROI Math

Scenario	Without AI	With DigiBabaa
Missed calls/week	5-10 lost	0 lost (auto text-back)
Google Reviews/month	1-2 (manual)	15-30 (automated)
Lead response time	2-24 hours	< 60 seconds
No-show rate	20-30%	< 5%
Monthly lost revenue	\$1,800 - \$5,000+	\$0 (recaptured)

**Our AI Integration Suite is \$297/mo.**

It pays for itself by catching just **TWO** missed calls. The rest is pure profit.

# Your Next Step

## The Free AI Audit

Stop paying for manual tasks that AI can handle for you. We're currently offering a **Free AI Automation Audit** to show you exactly how many hours of staff time (and lost revenue) you could save by implementing these 10 systems.
